Linear Search -Prices

LINEAR SEARCH -PRICES

"Read n product prices into an array. Sort ascending using any method. Use linear search to find the first price $\geq ₹500$ and the last price $\leq ₹200$. Display prices and indices (0-based), or ""Not found"". Validate sorted order; $n \leq 50$.

Sample Input: 7

150 650 220 90 500 780 180

Sample Output (after sort): 90 150 180 220 500 650 780

First ≥ 500 : index 4 (500)

Last ≤ 200 : index 2 (180)"
